### **DETAILED ACTION**

1. This action is responsive to communications: Application filed 01/07/2002.

2. Claims 1-24 are pending in the case. Claims 1 and 24 are independent claims.

#### **Drawings**

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the specific elements of the claims must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. The Office offers the recommendation of a figure illustrating the presentation zones recited in the claims.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Application/Control Number: 10/039,572 Page 3

Art Unit: 2179

### Specification

The disclosure is objected to because of the following informalities: On page 8, line 5, "JPEC" is recited rather than the intended "JPEG."

Appropriate correction is required.

### Claim Rejections - 35 USC § 112

5. Claims 1-24 rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited. Claims 1-23 are generally acceptable except for the multiple sentences and other problems below, however claim 24 is several paragraphs long and the scope can be reasonably appraised.

Regarding dependent claim(s) 6, the language "may include" is considered indefinite.

Regarding dependent claim(s) 13, the language "may contain" is considered indefinite.

Regarding dependent claim(s) 17, the term "enter" on lines 3 and 11 appears to be grammatically incorrect and should be "entering."

#### Claim Rejections - 35 USC § 103

6. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raggett "HTML 4.01 Specification, W3C Recommendation" 12/24/1999 found at http://www.w3.org/TR/1999/REC-html401-19991224.

Application/Control Number: 10/039,572

Art Unit: 2179

Regarding independent claim(s) 1, Raggett teaches mapping a page of an input document into a plurality of predetermined presentation zones (§6.1). Raggett teaches that they are reconstructed in a presentation option, or format as called for (§16.1, frame layout). Inherently they must be parsed into the their respective zones. Raggett does not explicitly teach a repository, however, it would have been obvious to one of ordinary skill in the art at the time of the invention to include a repository so that it could be stored and placed on the World Wide Web (Abstract).

Regarding dependent claim(s) 2, Raggett teaches that the document receives the output of another document (p. 210, "src").

7. Claims 3, 4 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raggett as applied to claim 2 above, and further in view of Honeycutt, "Positioning HTML Element," found at http://docs.rinet.ru/HTML4/ch18/ch18.htm.

Regarding dependent claim(s) 3, Raggett does not explicitly disclose layers. Honeycutt discloses layers, all of which inherently must be parsed (p. 3-5, §"Overlapping Multiple Elements"). It would have been obvious to one of ordinary skill in the art at the time of the invention to combine Raggett and Honeycutt in order to take overlay text and artwork (Honeycutt, p. 1, para. 2).

Regarding dependent claim(s) 4, Raggett does not explicitly disclose layers. Honeycutt teaches superimposing layers (p. 3, "Overlapping..."). It would have been obvious to one of ordinary skill in the art at the time of the invention to combine Raggett and Honeycutt in order to take overlay text and artwork (Honeycutt, p. 1, para. 2).

Application/Control Number: 10/039,572 Page 5

Art Unit: 2179

Regarding independent claim(s) 24, as described above the scope the claim is indeterminable, but for examining purposes only will be rejected under the same rationale as claim 4 above.

## Allowable Subject Matter

- Claims 5-23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
- The following is a statement of reasons for the indication of allowable subject matter:

  The prior art does not disclose or suggest the unique combination of all the formats listed in claim 5.

#### Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adam M Queler whose telephone number is (571) 272-4140.

  The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather R Herndon can be reached on (571) 272-4136. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
